

Heterosexual questionnaire (Loaded questions)

Non-heterosexual people are often asked questions which are based on an underlying assumptions that they are sick, immoral, evil, or just "not normal". The questions below turn these questions on heterosexuals. This can help to expose to absurdity and offensiveness of the questions, which are often asked of lgbtq identified people.

1. What do you think caused your heterosexuality?
2. When and how did you first decide you were heterosexual?
3. Did you ever consider that your heterosexuality could just be a phase you may grow out of?
4. Could it be possible that your heterosexuality is the result of a neurotic fear of people of the same sex?
5. If you have never had sex with a person of the same sex, could it be that all you need is a good experience of sex with a person of the same sex?
6. To whom did you disclose your heterosexual tendencies? How did they react?
7. Who do you heterosexuals feel compelled to seduce others into your lifestyle?
8. Why do you insist on flaunting your heterosexuality? Can't you just be what you are and keep it quiet?
9. Would you want your children to be heterosexual, knowing the problems they would face?
10. A disproportionate majority of child molesters are heterosexuals. Do you consider it safe to expose your children to heterosexual instructors/teachers/etc?
11. In spite of all the support for marriage in our society, divorce rates are rising. Why are there so few stable relationships among heterosexuals?
12. Why do heterosexuals place so much emphasis on sex?
13. Considering the menace of overpopulation, how could the human race survive if everyone were heterosexual like you?
14. Could you trust a heterosexual therapist to be objective? Don't you think he or she might be inclined to influence you in the direction of her or his own sexual orientation?
15. How can you become a whole person if you limit yourself to compulsive, exclusive heterosexuality and fail to develop your natural, healthy homosexual potential?
16. Suicide rates are much higher among heterosexuals than among homosexuals. Don't you think this has something to do with them being unstable and depressed because of their heterosexuality?
17. There seem to be very few happy heterosexuals. Techniques have been developed that might enable you to change if you really want to. Have you considered trying aversion therapy?
